Oncology Nursing Education Symposium

Target Audience: Nurses from all settings, Pharmacists, Physical Therapists, Respiratory Therapists, Student Nurses and Faculty.

Purpose: This program will explore the diverse topics in care of the Oncology patient. The emphasis will be on client centered needs emphasizing critical thinking for care that reflects best practice.

Learning Objectives:
After attending this program, the participant will be able to:
1. Describe the rationale for surgical intervention for patients with cancer.
2. Describe the pathology, diagnostics and treatment for Pancreatic Cancer.
3. Utilize research searching for "Best Practices" for progressive cancer care.
4. Describe state of mal nutrition common in cancer populations, the data that signifies the condition, treatment strategies and benchmarks for success.
5. Describe the pain experience unique to the Oncology patient; the nurse as an effective and safe partner in relieving pain.
6. Describe the risks, origin, therapy and the nurse role in treatment of cancer influenced coagulation disorders.
7. Describe the life threatening event of infection: decision making when every minute counts.
