

Nausea Prevention & Treatment

BEP: Aprepitant (IV)-Palonosetron-Dexamethasone-Lorazepam

- The following is a calendar to instruct you when to take your medicine.
- These medicines were prescribed to both prevent you from feeling nauseous (“sick to your stomach”) and treat nausea if it occurs after your chemotherapy.
- The days and dates are listed down the left column. The approximate time of day that you should take the medicine is listed across the top.
- It is important to take your medicine as instructed even if you are feeling well. It is easier to prevent nausea and vomiting than to treat it once it occurs.
- If these medicines are not helping you or you think they are causing a side effect(s) please call 732-235-2465 and ask for the Nurse Help Line. Ask for your doctor if after 5 p.m. or on a weekend.

**Aprepitant (IV) = Cinvanti[®], Palonosetron = Aloxi[®],
Dexamethasone = Decadron[®], Lorazepam = Ativan[®]**
