

Real Progress in the Fight Against Cancer

| Newspaper | Reach: 545 | Sentiment : Positive

Share article : [f](#) | [t](#) | [in](#) | [✉](#)

Sunday Star-Ledger - What risk factors related to specific cancers have you seen most frequently among both your older and younger patients? Dr. Steven K. Libutti: Risk factors including lifestyle choices and a family history of cancer are seen most frequently among both older and younger patients. At Rutgers Cancer Institute of New Jersey and RWJBarnabas Health, genetic testing is available to further define one's own risk of cancer as well as the risk to one's relatives. [Read More](#)

Partial Breast Stereotactic Radiation May Lead to Less Toxicity in Breast Cancer Treatment

| Online Publication| Erin Hunter | Reach: 383,848 | Sentiment : Neutral

Share article : [f](#) | [t](#) | [in](#) | [✉](#)

Pharmacy Times - David D'Ambrosio, MD, radiation oncologist at RWJBarnabas Health, joins Pharmacy Times to discuss CyberKnife, a new type of stereotactic body radiation that precisely targets tumors in stage 0 and stage 1 breast cancer patients. He is contributing author for a poster presented at the San Antonio Breast Cancer Symposium on December 6, 2022, which discussed the new radiation program

and its treatment potential. David D'Ambrosio, MD: Doing the standard-of-care for treatment of breast cancer with radiation therapy is typically somewhere in the neighborhood of 3 to 6 weeks of radiation every day, Monday through Friday. So, there has been—not recently but for many, many years—a movement to try to simplify this. [Read More](#)

Middletown Boy Facing Leukemia Buoyed by Friends, Family and NJ Devils

Middletown Patch - It was a surreal moment Martina Ferguson says she will never forget. It was an afternoon this past May and the Middletown mom was watching her son, 8-year-old RJ, and a friend play in the backyard when the call came in from the Rutgers Cancer Institute. "By that point, I had just had it. I was like, I cannot deal with this anymore. We are getting some answers," Martina Ferguson said. "I threw him in the car, and we just drove north up to Robert Wood Johnson (University Hospital)." RJ was admitted to the hospital for a full-body MRI and blood tests, plus a bone marrow biopsy. RJ can only go to school at Nut Swamp four days a week, and only in the mornings, because he is otherwise up at Rutgers Cancer Institute in New Brunswick receiving chemotherapy. Another thing to help take his mind off his diagnosis was a trip to see professional hockey. On Nov. 21 RJ joined the NJ Devils on the ice for their Hockey Fights Cancer Night, in collaboration with RWJBarnabas Health. [Read More](#)
