#### Participants will be able to:

1. Summarize current National Guidelines, AJCC staging, and survival data and its impact on surgical treatment of breast cancer.
2. Recognize reconstructive options for patients after lumpectomy.
3. Discuss newer types of mastectomies and oncologic safety of nipple-sparing approaches.
4. Identify National Guidelines related to the role and timing of radiation therapy for women who have had lumpectomy or mastectomy.
5. Identify factors that affect management of the woman who is a candidate for both breast reconstruction and Radiation Therapy.
6. Discuss timing of Breast Radiation Therapy relative to breast reconstruction.
7. Describe the pre-operative assessment and evaluation of women with breast cancer considering breast reconstruction after lumpectomy or mastectomy: H&P, type and timing of reconstruction, physical and psychological considerations.
8. Describe the autologous tissue breast reconstruction technique and identify ideal patient characteristics.
9. Discuss potential complications of autologous breast reconstruction and post-op surveillance.
10. Describe the appropriate imaging surveillance for the postoperative breast cancer patient.
11. Discuss appropriate imaging modality/technique for patients with breast implants.

**Accreditation Statement:** The Monmouth Medical Center is accredited by the Medical Society of New Jersey to provide continuing medical education for physicians.
