

Domestic Violence & the Role of the Healthcare Provider:

Assessment and Intervention Strategies

CME/CNE Certified Live Activity

Presented by:

Anna Trautwein, RNC

Practice Administrator, Women's Ambulatory Care Services
Saint Peter's University Hospital,
New Brunswick, NJ

February 27, 2014

4:30-5:00 pm Registration & Dinner

5:00-8:00 pm Seminar

Registration Deadline February 14th

Rutgers Cancer Institute of New Jersey
195 Little Albany Street, Auditorium A & B
New Brunswick, NJ 08903

Jointly Sponsored by the Center for Continuing and Outreach Education
at Rutgers Biomedical and Health Sciences and Robert Wood Johnson
University Hospital

This activity is supported by an educational grant from the
Verizon Foundation.

Intimate partner violence (IPV) is a major public health concern that affects four to six million relationships each year in the United States. Victims of IPV experience devastating and life-changing physical, emotional, relational and financial consequences that often continue to affect them even after the abuse has stopped.

Victims are very present in the healthcare system, and it is suggested that victims utilize the healthcare system as much as 2.5 times as often as non-abused patients. The impact on the healthcare system that results from intimate partner violence is great. For this reason, healthcare professionals are uniquely positioned and can play an important role in addressing the issue of IPV by identifying victims, offering support and referring patients to community agencies.

Healthcare professionals are among "the first-line response" for many people who experience IPV. Therefore, it is vital to have policies and protocols in place so that they can identify and record incidents of IPV and assist victims with getting the services and support they need. Unfortunately, healthcare professionals face a myriad of barriers that may hinder their ability to effectively identify and assist victims.

The goal of this seminar is to equip healthcare providers with the knowledge and resources necessary to provide services to abused women and men, and to allow them the opportunity to become more comfortable with screening their patients. Numerous healthcare organizations have recently released guidelines for IPV screening and recognizing the dynamics of family violence and the risk factors associated with those experiencing IPV. Healthcare providers will be informed regarding the dynamics of abusive relationships and the clinical signs of abuse, which are important when identifying and treating victims.

The seminar will present strategies to overcome barriers that have been shown to hinder screening and services for IPV victims in the healthcare system. In addition, healthcare professionals will be exposed to a variety of screening methods allowing for significantly higher detection rates as suggested by current evidence and provide or refer women who screen positive to interventional services. By screening earlier and more effectively, victims may be aware of help and resources that are available.

This seminar is designed for all healthcare providers involved in the healthcare of women.

Objectives:

- Recognize the impact of domestic violence on the health of the public and chronic health conditions strongly correlated with a history of IPV.
- Identify the barriers that prevent or negatively impact IPV screening and referring, and develop ways to address and/or remove them.
- Demonstrate effective and routine screening and assessment of patients, and refer those who respond affirmatively to appropriate services in the healthcare setting.
- Identify and provide patients with appropriate community resources to ensure effective management of patients who are victims of IPV.

Agenda:

- 4:30 PM Registration & Dinner
- 5:00 PM Welcome & Program Overview
- 5:10 PM Program
 - I. Domestic Violence Prevalence and Awareness
 - II. The Impact of Domestic Violence in Healthcare
 - III. Identifying and Addressing Barriers to Patient Care
 - IV. Strategies for Routine Screening and Referral of Patients
 - V. Role Play Exercises
 - VI. Community and Patient Resources and Support
- 8:00 PM Adjourn

Requirements: In order to meet the learning objectives and receive continuing education credits, participants are required to sign in, attend the seminar, partake in the pre and post-program assessments during the activity, and complete the program evaluation at the conclusion of the activity.

A letter certifying your attendance and credit verification will be provided to nurses at the conclusion of the program; physicians will receive their letters by mail within 45 days of attending the program.

Planning Committee:

- Rhina Acevedo, MD, Assistant Professor of Family Medicine and Community Health, Rutgers Robert Wood Johnson Medical School, New Brunswick, NJ
- Carlos Cordero, MSW, LCSW, Director of Social Services, Eric B. Chandler Health Center, Rutgers Robert Wood Johnson Medical School, New Brunswick, NJ
- Elaine Hewins, CSW, DVS, Domestic Violence Education & Awareness Program Coordinator, Robert Wood Johnson University Hospital Community Health Promotion Program, New Brunswick, NJ
- Kathleen Kelleher, APNC, DMH, MSN, CBHN, NP, DVS, Nurse Practitioner, Chilton Hospital, Pompton Plains, NJ
- Mariam Merced, MA, Director, Robert Wood Johnson University Hospital Community Health Promotion Program, New Brunswick, NJ
- Anna Trautwein, RNC, Practice Administrator, Women's Ambulatory Care Services, Saint Peter's University Hospital, New Brunswick, NJ
